                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PubMed=14702039;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     TISSUE=Synovial cell;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Seems to bind to collagen type IV and laminin.

SUBCELLULAR LOCATION: Type I membrane protein (isoforms 1 and 2).

Secreted (isoform 3). Isoform 1 is expressed at the cell surface while isoform 2 is predominantly sympacal mittle to the cell surface.
                                                     s SWISS-PROT entry is copyright. Alpha-D associates with beta-2 (By similarity).
-:- SUBCELUULAR LOCATION: Type I membrane protein (By similarity).
-:- DOMAIN: The integrin I-domain (insert) is a VWFA domain. Integrins with I-domains do not undergo protease cleavage.
-:- SIMILARITY: Belongs to the integrin alpha chain family.
-:- SIMILARITY: Contains 7 FG-GAP repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            EMBL;

"Experimental support for a beta-propeller domain in integrin alpha-
subunits and a calcium binding site on its lower surface.";

Proc. Natl. Acad. Sci. U.S.A. 95:4870-4875 (1998).

-I- FUNCTION: Integrin alpha-M/beta-2 is implicated in various
adhesive interactions of monocytes, macrophages and granulocytes
as well as in mediating the uptake of complement-coated particles.

It is identical with CR-3, the receptor for the iC3b fragment of
the third complement component. It probably recognizes the R-G-D
peptide in C3b. Integrin alpha-M/beta-2 is also a receptor for
fibrinogen, factor X and ICAM1. It recognizes P1 and P2 peptides
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  X-RAY CRYSTALLOGRAPHY (2.7 ANGSTROMS) OF 148-337.

                                           A Kania A.M., Reichenberger E., Baur S.T., Karimbux N.Y., Taylor R.W., Disen B.R., Nishimura I.;

"Structural variation of type XII collagen at its carboxyl-terminal T (1) domain generated by tissue-specific alternative splicing.";

L. J. Biol. Chem. 274:2263-2205(1999).

C -i- FUNCTION: Type XII collagen interacts with type I collagen-containing fibrils, the COL1 domain could be associated with the surface of the fibrils, and the COL2 and NC3 domains may be localized in the perifibrillar matrix (By similarity).

-i- SUBUNIT: Trimer of identical chains each containing 190 kDa of nontriple-helical sequences (By similarity).

Event=Alforeration.

DEVELOPMENTAL STAGE: The long NC3 XIIA isoforms are predominant at early stages (ED7 and 11); at later stages of development (ED15 and 17) the short NC3 XIIB forms become the major forms. As the short NC3 forms become the major product, the long splice variant continues to be expressed in several tissues, even after birth. The long NC1 isoforms, XIIA-1 and XIIB-1, peak in 15-day old embryos and decrease in 17-day old ones. The expression of the short NC1 form XIIB-2 remains constant throughout late stages of embryonic development (ED15 and ED17).

PTM: The triple-helical tail is stabilized by disulfide bonds at
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                similarity).

J. Cell Biol. 130:1005-1014(1995).

-I- FUNCTION: Type XII collagen interacts with type I collagen-containing fibrils, the COL1 domain could be associated with surface of the fibrils, and the COL2 and NC3 domains may be localized in the perifibriliar matrix.

-I- SUBUNIT: Trimer of identical chains each containing 190 kDa on nontriple-helical sequences.

-I- ALTERNATIVE PRODUCTS:

Event-Alternative splicing; Named isoforms=2;

Comment=The final tissue form of collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collagen XII may contain the collag

May play a role in the atherosclerotic process such as clearing lipoproteins from plaques and in phagocytosis of bloodborne pathogens, particulate matter, and senescent erythrocytes from the blood.

-I- SUBUNIT: Heterodimer of an alpha and a beta subunit. Alpha-D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Van der Vieren M., Crowe D.T., Hoekstra D., Vazeux R.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           [mmunity 3:683-690(1995)
                                                                                                                                                                                                                              ASSOCIATES WITH Deta-2.

SUBCELLULAR LOCATION: Type I membrane protein.

TISSUE SPECIFICITY: Expressed moderately on myelomonocytic cell

lines and subsets of peripheral blood leukocytes and strongly on

tissue-specialized cells, including macrophages foam cells within

atherosclerotic plaques, and on splenic red pulp macrophages.

DOMAIN: The integrin I-domain (insert) is a VWFA domain. Integrins

with I-domains do not undergo protease cleavage.

SIMILARITY: Belongs to the integrin alpha chain family.

SIMILARITY: Contains 1 VWFA domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Exp.
